RESIDENCE 7 WINDOWS | CLOTTED CREAM ● CHALK WHITE

My RESIDENCE

Case Study

These modern windows and doors have transformed this stunning home in Cheshire. R7 was the natural choice due to its modern character that retains the beautiful charm of the property, with a traditional mechanical joint providing the ultimate timber alternative aesthetic through the home.

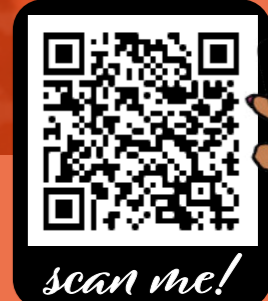

But it doesn't stop there! These intelligent windows provide an energy rating of A++ and u-value 1.2W/m²K.

This really appealed to the homeowners who were used to wooden windows that required years of maintenance. In a time where energy efficiency and insulation is more important than ever, the stellar thermal properties of the R7 collection really helps to keep the heat in.

“The internal benefits have been great, economically the house is much warmer”
- The Homeowner
